

LIGHT
AS AN EXPRESSION
OF LIFE

T-LUCE COMPANY PROFILE

ABOUT US

T-Luce is an Italian lighting company operating in today's fast-evolving architectural lighting market.

Our team consists of seasoned professionals with over 25 years of experience in the lighting industry. Our mission is to deliver and supply innovative lighting solutions that enhance comfort and elevate the environments in which we live and work.

With offices across Asia, the Middle East, and Europe, T-Luce is truly an international lighting company.

Our strength lies in our attention to detail and continuous innovation, combined with the expertise and know-how gained over decades. Driven by our passion for light, T-Luce provides high-quality architectural lighting solutions for our global clients and partners, meeting the demands of today's challenging indoor and outdoor environments.

WE OFFER

Solid-State Lighting Expertise

Empowering customers worldwide through our lighting expertise, experienced team, and trusted network of partners.

Design Support Services

Helping customers accelerate adoption with our comprehensive suite of design tools, global lighting resource centers, tailored application solutions, and extensive product portfolio.

Supply Chain & Business Solutions

Supporting customers growth with world-class service, global supply chain solutions, a dedicated LED distribution network, flexible payment terms, and value-added loyalty programs.

LIGHTING SOLUTIONS

The diverse skills and expertise of T-Luce's experienced, multicultural team elevate our professionalism and enable us to offer a wide range of competencies, expanding design capabilities.

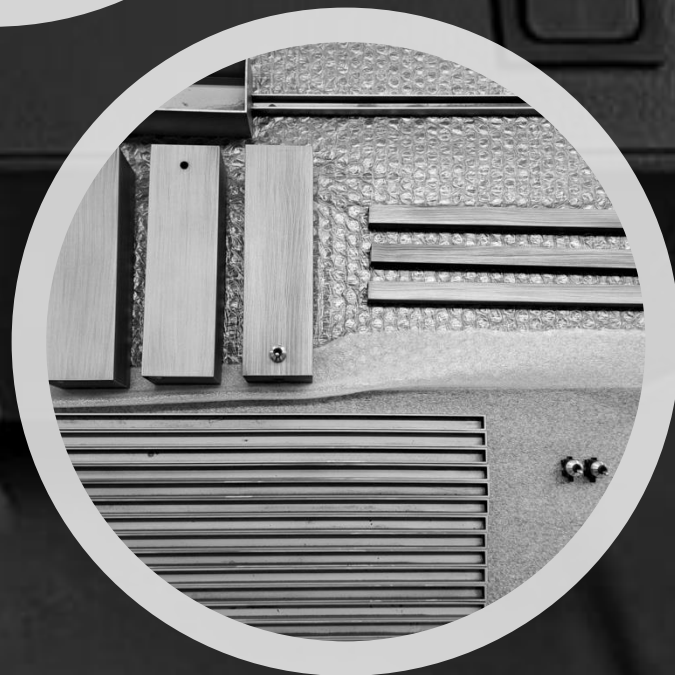

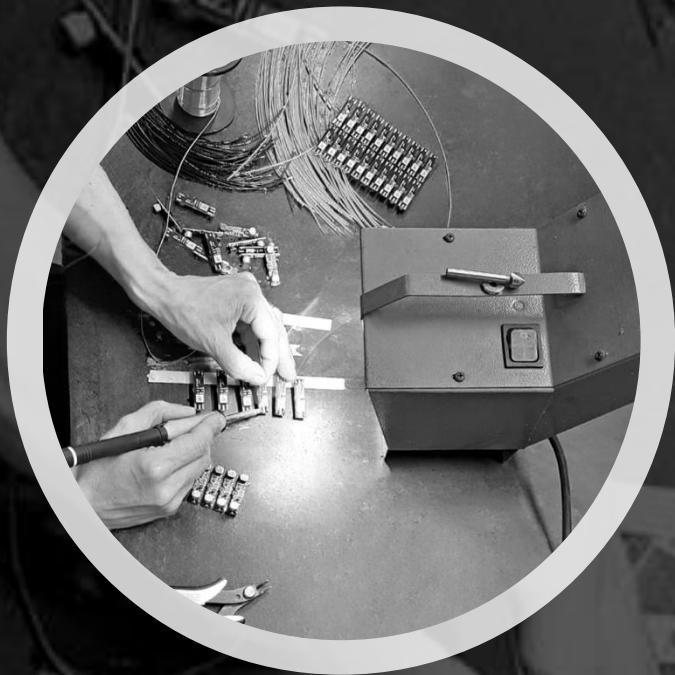

T-Luce thrives on collaborative partnerships with an international network of architects, designers, and technicians.

We are driven by a passion to serve specifiers effectively, ensuring compliance with environmental and safety standards in each country of operation, responding within planned timeframes, and honoring the aesthetic and engineering integrity of our products.

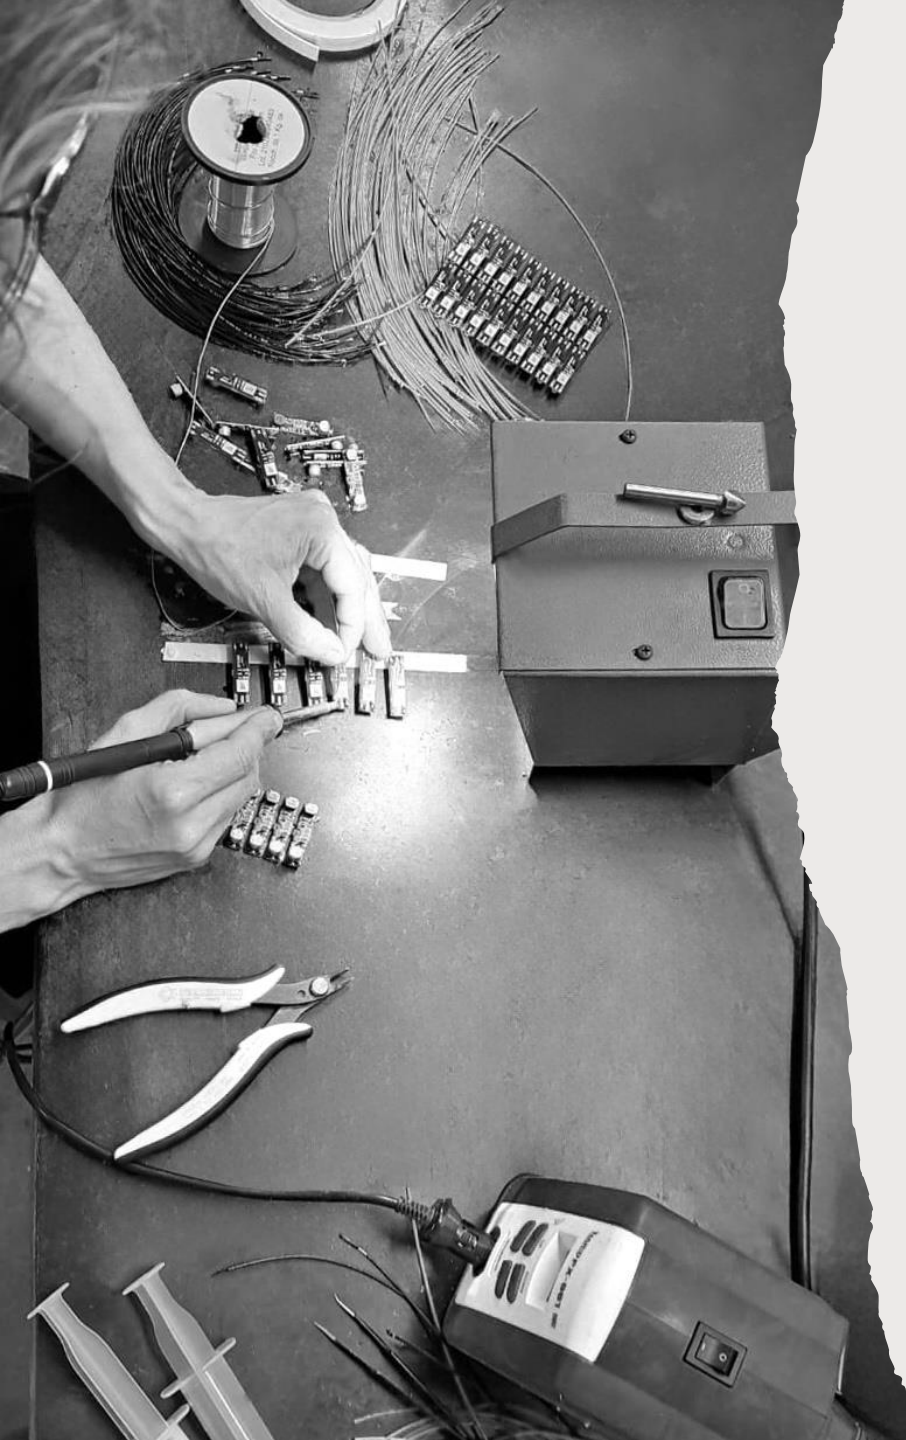

**WE STRIVE FOR EXCELLENCE IN CREATING

OUR CLIENTS

GOOD LIGHT MEANS GOOD BUSINESS

Premium products, attractive prices, and friendly service build customer loyalty. Yet in today's retail environment, atmosphere and emotional experience are increasingly vital for long-term success.

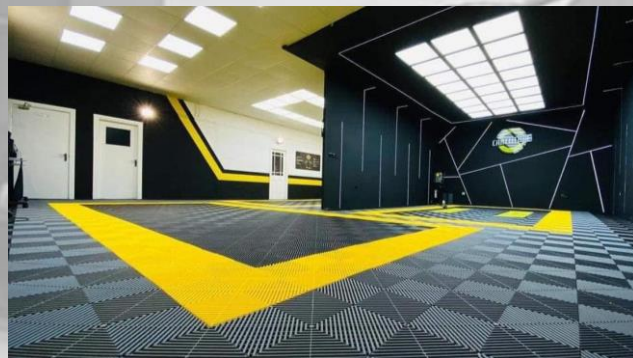

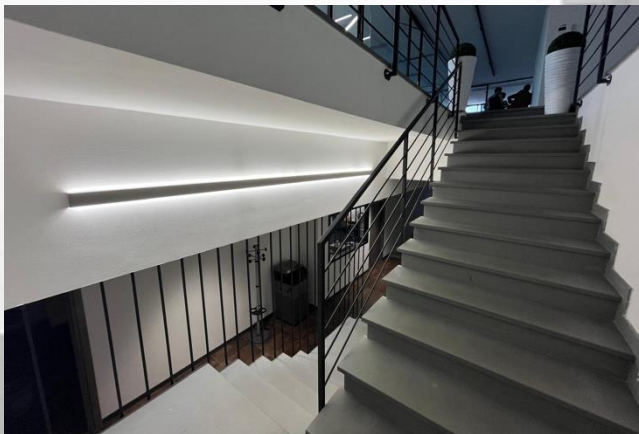

People perceive up to 80% of their surroundings visually, and lighting plays a key role during shopping: it sets the mood, evokes emotions, highlights products, and guides customer attention.

We illuminate your products to their best advantage—whether through color-accurate general lighting, striking spotlights, or efficient light management systems—providing ideal lighting solutions for any requirement and sector. Efficient, flexible, and tailored, our solutions empower you to achieve retail success.

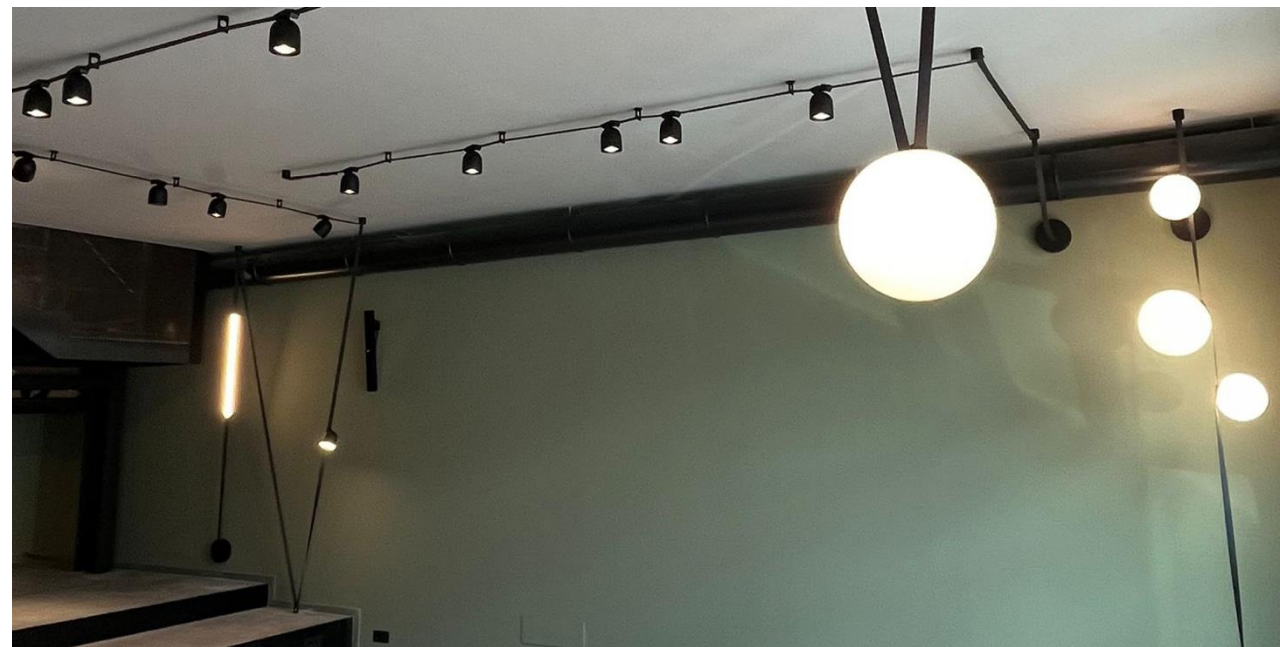

A low-angle, black and white photograph of several tall skyscrapers reaching towards a cloudy sky. The perspective is from the ground looking up, making the buildings appear to converge towards the top. The image has a torn paper effect along the bottom edge, where the dark, textured surface of the paper is visible against the lighter background of the buildings and sky.

LIGHTING SOLUTIONS FOR THE INDUSTRY

Storage, production and logistics. People, machines and processes.

All cogs must be perfectly coordinated if an industrial company is to function successfully, and an important precondition for this is the right time, and in the right location.

Employees need optimal visual conditions to work in a concentrated way and without errors, and to safely operate machines.

At the same time though, companies must keep a close eye on energy overheads.

What counts at the end of the day is total efficiency in terms of economic luminaires and components, simple installation and flexible utilization, modular systems, light control and upgrade options. We provide all of this from a single source, giving success at the end of the day.

LIGHT FOR GREAT SAFETY AND VISIBILITY

Efficient light for greater safety and visibility. Innovative lighting solution for public spaces.

Safety in road traffic, attractiveness of the area and protection of property: road lighting is an important and necessary part of our infrastructure, but it is also a strain of community budgets and for ecological balances.

Combining quality of light and energy efficiency is primary importance. The future will be determined by LED technology, and lighting was never as efficient, flexible and innovative.

Completely new options have become apparent in all facets of lighting, including energy consumption, maintenance levels, quality of light, control and design.

We purposefully design this future to enable local authorities to make traffic routes safer, architectural areas more appealing and energy balances more positive, with a better quality of light.

LIGHTING FOR TRAFFIC ROUTES: LIGHT MAKES HAZARDS MORE VISIBLE

The main task of road lighting is apparently simple: to ensure sufficient visual conditions for all road users. Minimum levels are stipulated by standards (EN 13201). Road users should be able to identify changing situations as well as sudden occurrences quickly and clearly, and at distances to have enough time to respond. Technical road lighting with a high, functional quality of light makes an active contribution to this.

LIGHTING FOR SQUARE AND PATHS: LIGHT ENLIVENS URBAN ENVIRONMENT

Light makes places attractive and contributes to the positive appearances of a town or district. During the day, luminaires set design accents, and at night their light effects determine appearances. In addition to the functional task of illumination (EN 13201), luminaires also achieve atmosphere and ambience. The lighting of urban environments increases the level of attraction and is also able to enliven inner cities and promote business and gastronomy.
